

THE VAULT

SCL Season 2: Official Mechanics & Rules

Overview

The Vault is an official banking mechanic for **SCL Season 2**. It offers a risk-free alternative to the prediction market, allowing managers to lock away capital to secure a compounded war chest for the next season's draft.

"Choose between total liquidity for betting or guaranteed wealth for the future."

Core Rules

1. The Deposit & Lock

Deposits are converted from "Liquid Cash" (betting funds) to "**Locked Capital**." Once moved, the principal is untouchable until the end of **Match 12**.

2. Yield & Reinvestment Choice

The Vault generates **7% yield per match**.

- **Default (Compounding):** Profits are automatically added to the principal, increasing the yield for the next match.
- **Manual Harvest:** Managers have the option to not reinvest match profits. In this case, 7% is calculated only on the initial principal each match.

3. The Iron Lock (Standard)

Unless harvested (if profits are not reinvested), all funds remain strictly locked until the season conclusion. There are no emergency withdrawals.

Compounded Growth Projection (7%)

If profits are reinvested (Compounding), a 2,000 unit deposit grows as follows:

Match	Starting Balance	7% Yield	New Locked Balance
M1	2,000	+140	2,140
M2	2,140	+150	2,290
M3	2,290	+160	2,450
M4	2,450	+172	2,622

Match	Starting Balance	7% Yield	New Locked Balance
M5	2,622	+184	2,805
M6	2,805	+196	3,001
M7	3,001	+210	3,212
M8	3,212	+225	3,436
M9	3,436	+241	3,677
M10	3,677	+257	3,934
M11	3,934	+275	4,210
M12	4,210	+295	4,504

Strategy Tip: Compounding (Reinvesting) leads to a ~2.25x return. Choosing not to reinvest will result in a ~1.84x return (84% total profit) with steady payouts.
