

Official SCL Season 2 document

SCL Season 2 — Official Rule Book

Section-C Cricket League · Season 2 · Official Rules & Regulations · V2.0

*This rule book is the binding document for all teams, players, and managers. It is supplemented by three operational guides: the **Vault Guide**, the **Wagers Guide**, and the **Economy Guide**. Where the platform and this document disagree, the platform is the source of truth for mechanics; this document is the source of truth for rules.*

1. Tournament Format & Standings

1.1 Season structure

- **12-match Double Round Robin** — every team plays every other team twice.
- **No final.** The team that tops the table after all 12 matches ****wins the season outright and is crowned League Champion****.

1.2 Points system

Result	Points
Win	2
Draw / tie	1
Loss	0

1.3 Tie-breakers (in order)

- 1 **Net Run Rate (NRR)**
- 2 **Head-to-head** record between the tied teams
- 3 **Total boundaries** scored across the season

1.4 Administration & neutrality

- The **President is now an active manager**, so an ****external, unbiased member** is added to the **committee**** to resolve disputes and keep the league fair.

2. The Draft & Player Tiers

2.1 Auction order (Season 2)

`` Platinum Players → Gold Players → 5-minute Trade Break → Silver Players `` - Bidding happens **tier by tier**; the auction engine exposes one phase at a time. - A **5-minute trade break** sits between the Gold and Silver phases. - **Phase B** (after Silver) is the final chance to fill incomplete rosters at a fixed price (see the Economy Guide).

2.2 Tiers, base prices & credits

Tier	Base price	Draft credits per player
Platinum	3,000	3
Gold	2,000	2
Silver	1,000	1

- Each team has a **total of 8 draft credits**. A player's credits are deducted when you

win them; unspent credits refund **1,000 each** at the end of the draft. - **Bid increments** are fixed at 50 (i.e. bids must rise in 50-unit steps from the base or the current bid). - A team roster is **4 players**: the **manager (their own player)** plus **3 bought players**.

2.3 Mandatory rosters

- If players remain **unsold after the draft**, admins will **forcefully assign** them to incomplete teams so every team fields a full roster.

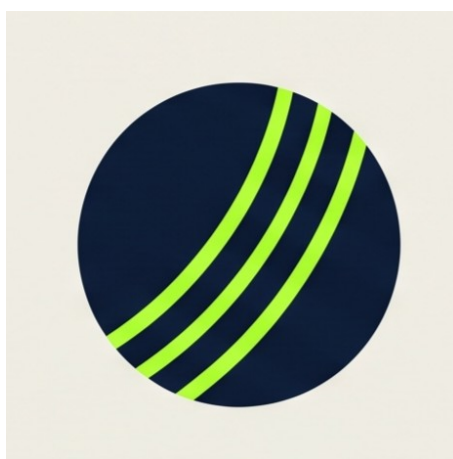

3. Teams & The Season

3.1 Team identity

- Teams are **persistent** across seasons — name, logo, and about section live with the team, not the season. A team that is not playing this season still exists and is managed from its owner's account. - **Team branding**. Every team has a **logo** and a **wide banner**. The manager uploads both from their account page; the committee can also set or replace them from the admin panel. When a team has **no logo or banner of its own**, the **official SCL brand is shown by default** — so the league always looks consistent:

The official SCL wide banner — the default shown on a team page until the team uploads its own.

The official SCL logo mark — the default team logo until the team uploads its own.

- **Every player gets the universal 10,000 funding** before the S2 auction. There is **no tier purse** — a team's money is its **manager's wallet**. - **Pre-auction balancing grants**: admins may gift **weaker managers extra funds before the auction** (on top of the 10k) to level the field — at the committee's discretion, case by case, recorded with a comment in the ledger.

3.2 Umpiring duty — every team must contribute

- **Every team must volunteer to umpire at least 3 matches** across the season.
- The committee keeps an umpiring log. If a team has ****not fulfilled its 3-match quota** by the end of the season, a fine of 1,500 is charged** to the team's wallet.

3.3 Match rewards

- Each **finalized match** credits **250 to every player's wallet** (not just the two teams that played) — this is the fuel that keeps the economy liquid. See the Economy Guide.

4. Player Movement

4.1 Substitution / release clause

- A team may **release a player** from its squad under the **Substitution Release Clause**:
- The releasing team pays the ****player's release value = 50% of the price the player was sold at in the auction (their auction price). - The released player becomes available again (admin handles the re-allocation). - This is a financial** mechanism** — it does not bypass Phase B or trade windows.

4.2 Trades

- During the **trade break** (and any open trade window), managers may propose swaps of players **with optional cash in either direction**. Both sides must accept.

5. Discipline & On-Field Conduct

5.1 Field invasions

- **Fine of 500** to the **manager of the team** whose player (or any non-playing team member) **invades the field of play**. Applies per incident, whether the match is live or in between overs.

5.2 The Kela Protocol

- For **recurring disputes or repeated violations**, management reserves the right to **strip a manager of team authority and hand control to the team's players**. The admin dashboard's takeover/restore tool is the enforcement mechanism.

5.3 Match & market integrity

- **Match-fixing and collusion are zero-tolerance**. The admin team monitors for suspicious play or unnatural betting volumes; compromised markets are **voided immediately and all stakes refunded** (see the Wagers Guide).

6. Marketing & Announcements

6.1 Sponsored match announcements

- A manager may **sponsor a match announcement** on the official announcements group for **200** — used to **promote their upcoming match, or (in good spirit) to talk trash**. - Payment is taken from the manager's wallet at the time of posting; the admin confirms and posts on the manager's behalf. - Content stays within the league's code of conduct — abusive or defamatory posts may be removed without refund.

7. Money, the Vault & Prediction Markets (summary)

Full mechanics live in the three guides; the essentials:

- **Wallet** — every player has one; for managers it is also the team's money.
- **Vault** — lock funds for a **7% compounded yield per match**; choose auto-reinvestment

or manual harvest. Locked capital is untouchable until the end of Match 12. (Vault Guide) - **Prediction markets** — pooled Yes/No markets with **fair-odds House guarantee**: the House automatically tops up so winners always get at least fair odds. (Wagers Guide) - **Auto mode** — if you don't want to manage your finances, everything that comes in goes straight to your vault automatically. (Economy Guide)

8. Fines & Penalties at a Glance

Rule	Amount
Missed umpiring quota (fewer than 3 matches volunteered)	1,500 at season end
Field invasion by your team's member	500 per incident
Player release (Substitution Release Clause)	50% of the player's auction price
Sponsored match announcement	200 per post
