The SCL Economy — Season 2 Guide

Section-C Cricket League · Official Money & Wallet Mechanics

Season 2 runs on a **single wallet system**: every player has one bank account, and for managers **that account IS the team's money**. There is no separate team purse — the team starts with its manager's wallet and everything flows through it.

1. Your wallet

Money	What it is	Used for
Liquid cash	Spendable balance	Auction bids, wager stakes, vault locks, trades
Locked capital	In the vault, earning 7%/match	Long-term savings (see the Vault Guide)

- **Every player gets one wallet** — even if you never sign up, the league creates it for you (it runs on auto mode by default). - **Only the admin can add balance** to a wallet (grants with a comment, e.g. "credit saved"). There is no player-facing deposit — don't ask, just request the admin.

2. Season 2 funding — the universal 10k

- **Every player is funded 10,000** before the S2 auction.
- **There is no tier purse.** Platinum/Gold/Silver teams all start from their manager's 10k — the auction is a test of judgment, not of starting pockets. - This is done **once**, before the auction, by the admin (**Fund all players**).

2.1 Pre-auction balancing grants

- The admins may **gift weak managers extra funds before the auction** to balance the field — e.g. a first-time or struggling manager may receive a top-up on top of the 10k. - These grants are at the **admin's discretion**, applied per team, and are recorded with a comment (visible in the ledger). They happen **before** the auction so the extra money is available for bidding. - There is no fixed formula — the committee decides case by case.

3. Where money comes from

Source	Amount	Notes
Universal funding	10,000	Once, before the auction
Match credit	250 to every player	Per finalized match — the economy's heartbeat; auto-vaulted if auto mode is on

Source	Amount	Notes
Vault yield	7% per match	Compounding unless manual harvest (Vault Guide)
Wager payouts	variable	Winners get ≥ fair odds (Wagers Guide)
Admin grants	variable	Bonuses, "credit saved", compensation — admin only, with a comment
Credit refund	1,000 / unused credit	Unspent draft credits refunded at draft end

4. Where money goes

Outflow	Amount	Notes
Auction bids	your bid	Charged at lot close when you win a player
Squad-cost levy	average squad cost	Charged to wallets that didn't spend in the auction — auto-applied when the draft completes (see below)
Wager stakes	your stake	Into the Yes/No pool; refunded or paid at resolution
Vault locks	your choice	Liquid → locked capital
Fines	see table	Field invasions, missed umpiring, etc.
Player release	50% of auction price	Substitution Release Clause
Sponsored announcements	200 per post	Match promotion / trash talk (Rule Book §6)

5. The auction & credits

- Bidding is tier-by-tier (Platinum → Gold → Trade break → Silver → Phase B), in **50-unit

increments **from the base price (3,000 / 2,000 / 1,000)**. - **Teams draft with credits: 8 total, 3/2/1 per**

Platinum/Gold/Silver player won. Unused credits refund 1,000 each. - **A full roster is the manager + 3 bought players** (4 total).** If players remain unsold after the draft, admins assign them to incomplete teams.

5.1 Squad-cost levy (read this — it affects everyone)

When the draft completes, the **average squad cost** (total auction spend ÷ number of teams) is **deducted from every wallet that didn't spend in the auction**. It comes out of liquid cash first, then the vault for auto-mode accounts. This keeps the league fair: teams that sat out the auction still contribute their share of the market value.

6. Auto mode — the hands-free option

- Auto mode ON:** everything that comes in (grants, the 10k, the 250/match credits)

goes **straight into your vault** and compounds at 7% per match. You never manage cash. - **Auto mode OFF:** money lands in liquid cash; you manage bids, stakes, and locks yourself. - Flip it anytime from /account. **Needed off** if you want to bid or stake. - Wallets created for players who never signed up default to **ON**.

7. Fines & penalties (Season 2)

Violation	Fine
Missed umpiring quota — fewer than 3 matches volunteered by season end	1,500
Field invasion by your team's player/member	500 per incident

Violation	Fine
Recurring disputes / misconduct	Manager authority stripped (Kela Protocol) — team handed to players
Match-fixing / collusion	Market voided, stakes refunded, disciplinary action

8. Money model at a glance

`` Admin grants █ 10k funding █ 250/match ████████ WALLET (liquid) █ vault lock █ VAULT (7%/match, iron lock) Wager payouts █ █ auction bids (players) █ wager stakes (Yes/No pools) █ fines / releases / sponsored posts █ squad-cost levy (draft end, non-spenders) ``

9. Key numbers to remember

Thing	Number
Universal funding	10,000
Match credit (every player)	250
Vault yield	7% per match (cap 12 matches)
Platinum / Gold / Silver base	3,000 / 2,000 / 1,000
Bid increment	50
Draft credits (total)	8 (3 / 2 / 1 per tier)
Credit refund	1,000 each
Squad-cost levy	average auction spend, non-spenders
Umpiring quota	3 matches (else 1,500 fine)
Field invasion	500
Sponsored announcement	200
Player release	50% of auction price
